## Congruent Triangles <br> Side-Angle-Side

If 2 sides and the included angle of one triangle is congruent to 2 sides and the included angle of another triangles, the triangles are congruent

$\Delta C A B \cong \triangle F D E$

Name the congruent triangles.
1.

2. $E$ is midpoint of $\overline{\mathrm{AB}}, E$ is midpoint of $\overline{\mathrm{CD}}$

3. $\overline{\overline{\mathrm{CX}}}$ is the perpendicular bisector of $\overline{\overline{\mathrm{AB}}}$
