## Geometric Mean Theorems - Right Triangles - Altitude

Altitude is Geometric Mean between Segments of Hypotenuse

$$
\frac{A X}{C X}=\frac{C X}{X B}
$$

Use the above diagram to do the following problems.

1. Find CX if $\mathrm{AX}=2$ and $\mathrm{XB}=8$
2. Find AX if $\mathrm{CX}=6$ and $\mathrm{XB}=9$
3. Find XB if $\mathrm{AX}=4$ and $\mathrm{CX}=8$
4. Find CX if $\mathrm{AX}=5$ and $\mathrm{XB}=20$
5. Find XB if $\mathrm{CX}=12$ and $\mathrm{AX}=6$
6. Find CX if $\mathrm{AX}=7$ and $\mathrm{XB}=28$
7. Find CX if $\mathrm{AX}=3$ and $\mathrm{XB}=4$
8. Find AX if $\mathrm{CX}=8$ and $\mathrm{XB}=12$
