EXAMPLE 1 Let $\mathrm{U}=\{$ letters in the alphabet $\}$

$$
\mathrm{M}=\{\mathrm{q}, \mathrm{r}, \mathrm{~s}, \mathrm{t}, \mathrm{z}\}, \quad \mathrm{N}=\{\mathrm{s}, \mathrm{p}, \mathrm{o}, \mathrm{t}\}
$$

Find $\mathrm{M} \cap \mathrm{N}$.
What members are common to both sets? Or another way of asking, which letters are in both set M and set N ? The intersection is $\{\mathrm{s}, \mathrm{t}\}$, so $\mathrm{M} \cap \mathrm{N} .=\{\mathrm{s}, \mathrm{t}\}$

## Example 2

$$
\text { Find } A \cap B, \quad \text { if } A=\{d, e, f, g\} \text { and } \quad B=\{d, o, g\}
$$

Since we want to find the intersection, we are looking for elements common to both. So looking at the sets, which elements, if any, belong to both sets A and B ?

Hopefully, you noticed $d$ and $g$ are in both sets, therefore

$$
A \cap B=\{d, g\}
$$

Example 3 Let U = \{Adam, Bob, Carl, Diane, Elie, Flower, Gail, Helen, Irene $\}$
Glee Club $=\mathrm{G}=\{$ Adam, Carl, Diane, Gail, Helen, Irene $\}$
Honor Society $=$ HS $=\{$ Adam, Bob, Flower, Elie, Gail, Irene $\}$
Who belongs to both Honor Society and Glee Club?

Example 4 Let $\mathrm{U}=\{\mathrm{a}, \mathrm{b}, \mathrm{c}, \mathrm{d}, \mathrm{e}, \mathrm{f}, \mathrm{g}\}$
$\mathrm{A}=\{\mathrm{d}, \mathrm{e}, \mathrm{f}\} \quad \mathrm{B}=\{\mathrm{a}, \mathrm{b}, \mathrm{c}, \mathrm{d}, \mathrm{e}\} \quad$ Find $A \cap B$,
