

## Line Graphs

A line graph—also known as a line plot or a line chart—is a graph that uses lines to connect individual data points. A line graph displays quantitative values over a specified time interval.

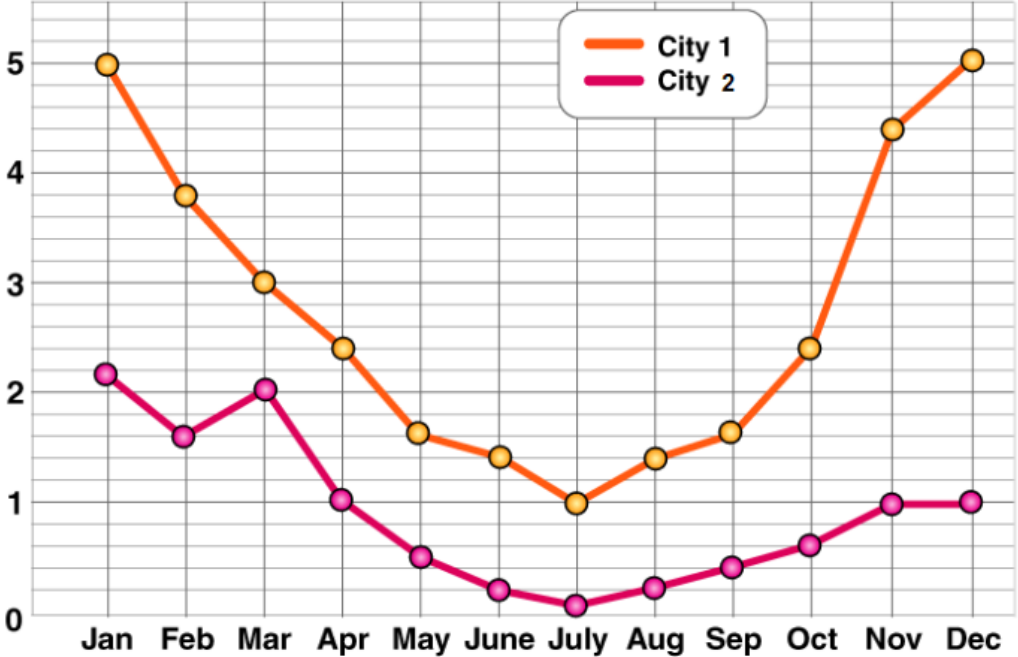

In finance, line graphs are commonly used to depict the historical price action of an asset or security.

# Line Graph Comparisons

# Average monthly rainfall

A report on the average value of homes over the last 3 years indicated in the first year the average home value declined at a constant rate. In the second year, home values had no change, and in the 3<sup>rd</sup> year, the average value increased at a constant rate.

Which graph best represents the data in the report.
