We had the following relationships $-90^{\circ}$

$$
\begin{array}{ll}
\sin \mathrm{Q}=5 / 13 & \sin \mathrm{R}=12 / 13 \\
\cos \mathrm{Q}=12 / 13 & \cos \mathrm{R}=5 / 13 \\
\tan \mathrm{Q}=5 / 12 & \tan \mathrm{R}=12 / 5
\end{array}
$$
